## Leading Teams

Creating and leading strong teams is a core skill of successful managers. This course builds on basic management skills to prepare participants to manage in a team setting or enhance existing skills.

Participants examine the different roles that people play in a team and techniques to leverage people's inherent strengths to strengthen the overall team.

Program Outcomes

- Differentiate between a team and a group
- Recognize and resolve the types of team conflict
- Define a team's purpose
- Recognize impact that the team leader has on the experience of the team
- Know the stages of team development and how to lead through each one
